## ● 50-683 R9 3/4 & 1-ton Single Rear Wheel Truck Adapter

Pro-Cut would like to introduce the newest version of our 3/4 & 1 ton single rear wheel truck adapter, the 50-683 R9. This represents the 9th revision of this popular truck adapter and includes changes that were required to accommodate the new 8 on 180mm bolt pattern on the 2011 GM 2500HD/3500HD SRW models.

This new adapter retains the 8 on 6.5", 8 on 170mm, and 10 on 7.25" bolt patterns that were on the previous 50-683 R8 version. This adapter not only covers the new GM trucks, but will also cover some Dodge, Ford, and Nissan NV vans.

**NOTE:** Some trucks in this size category may require disconnecting the drive shaft or removal of an axle for use with a Pro-Cut lathe. For specific application instructions, contact the Pro-Cut Service Department at 800-543-6618.

GM 2500/3500 SWR

Nissan NV 3500
