Adapter: **50-935**
Rev9
DUAL REAR WHEEL TRUCK

USAGE INSTRUCTIONS: 50-935 Rev9

50-935 Rev9 Adapter

Pro-Cut has a new version of the 1-Ton Dual Wheel truck adapter, the 50-935 Rev9. This revision incorporates the new bolt pattern, 8 on 210mm; found on the 2011 GM 3500HD dual rear wheel trucks. The new revision retains the patterns found on the 50-935 Rev6.

The 50-935 Rev 9 is used on both front and rear wheels of the GM 3500HD dual wheel truck. The rear wheels do need additional parts in order to properly attach the adapter to vehicle. These parts are 50-005 stud extenders, 50-179 lug nut kit and a reach extension plate, 50-492, 50-495 or 50-1492 depending on your gear box/cutting head design style. Some trucks in this size category may require disconnecting the drive shaft or removal of an axle for use with a Pro-Cut lathe.

50-005 Stud Extenders

50-179 Lug Nut Kit

50-492 / 50-495 / 50-1492
Reach Extension Plate
